

MOVE FORWARD IN WILL - SPIRIT

INTRODUCTION

The rule 11 says that a new Word is suggested to a group; after the festival of evolution (of the world servers) in December 2012, a new word appeared and, in fact, the association was re-founded on the 6th of October 2013 with the name of WILL SPIRIT. The rule follows in saying "The outer group dies, occultly speaking" and, since 2025, we merge into the ashram or the attractor amidst the Assembly.

With our Elders, we pulse in the universe, we add our life to the power of the Heart and support the threefold pulsation of the human Expressing (its archetype). We sense too the outpouring of electric fire coming from the Source of Life; thus participate –very poorly – to the Heavenly Man, to Its mission.

These lines translate a road explored, deepened, checked, then redacted by a being on the line 1 – 5 -3, hence the abundance of forms. Some landmarks will talk to you, others not and can be changed or are superfluous. Yet Maitreya unites Will to Love and Intelligence, and the will is developed within the ashram; hence whatever your ray, use what fits for you, you can draw in the available resources, you know that.

THOUGHTS OF THE AUTUMN 25

Threefold tension (again)

To stir (in French remuer) means in the Middle Age to set in motion, but the prefix re points to a repetition and a move without any precise sense. To moult has the advantage to point to a internal transition and, as in the adolescence, involuntary and unconscious.

Centres of the Expressing One

The 3rd aspect of the Expressing One corresponds to Mm, to the centre of awakening of the hara or Tan-Tien under the navel, which rebounds on Ming Men (L2) in the spine – at least I feel an echo at this place. This 3rd aspect (arousing evolution) conditions the personality who faces the world; one may thus feel a repercussion in the ajna centre. This impression to face the world, alone, differs neatly of the energy column received in the crown.

The 1st aspect of the Expressing one corresponds to Ma, will to manifest; this will comes from the monadic will and is activated after the 5th initiation, under the dependence, in alignment, with the will of the One, with the Logos. The Master has the ability to activate this reservoir of energy in the coccygeal centre, in being receptive in the crown to the direction or purpose impulsed by SK.

The 2nd aspect of the Expressing one, corresponds to Mu, heart of Brahma, whose the centre of awakening is located above the pubis. At the 4th initiation, the mystery of polarity (or of the role of sex) is revealed and the receptive energy of Venus takes a new meaning: the substance is extended and the positive – emitting pole enables to overcome, to disengage and to destroy the radiating substance of the causal body, a light weak or warm compared to the light of intuition.

Sensing is one thing; realizing, assimilating, using is another step.

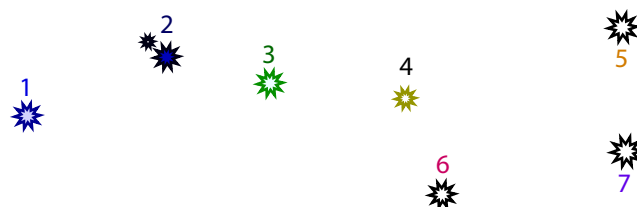

What prevents our friends to broaden their cognitive horizon, to overcome the mental body, to disengage from their thought-form of their world conception, this is called the 3rd initiation. They are on their way, it's up to them to move forward; one may assist them, help them, but not to move forward in their place; their steps will make them grow.

Harmonies of the great Bear

The stars of the great Bear, with their rays, spot the yearly progression around the zodiac; they tune for a great part with the creative Hierarchies or clusters of lives – with a subdominant.

Leo **1**-5, Virgo **2**-6, Libra **3**, Scorpio **4**, Sagittarius 4- **5** -**6**, Capricorn 1-**7**

Then Aquarius **5**, Pisces, **2**-6 Aries **1** -7, Taurus **4**, Gemini **2**, Cancer **3**-7

This diagram shows how much the stars are more incisive, alive, impactful than this image.

Thus a solar Logos plays a melody, with these Rays.

Revealing and realizing Will

Will is first of all destructive when passing the 4th initiation; it destroys the causal body, as the black hole destroys any form of matter. The revealing will can be related to the film of light around the black hole. In fact, all is revealed in

that light emitted by the dark kernel of will; it is more than a film but really an electric radiance creating this light. And the realizing will describes the tension, the inflow, the force imposing itself at the centre of this black hole and producing it. That's how one may read this passage of Rays and Initiation [R5:650]. The following page states that one can "see that which is to be revealed and to accept revelation", that "definite realisation which enable him to live by means of its light". Light: impact of Spirit in space, whatever the finesse of this substance; one could say that the central spur produces the pulsation of light.

Will or Willing

Esoteric astrology [R3:584] distinguishes neatly between desire that rises and the will that goes down and asserts. Rays and Initiations [R5:714] distinguishes the purpose and the will; it seems to be the implementing will, an octave of determination. But the purpose is a thought of the Logos, infused with will, ray of His Mind; in fact we search not only for the thought, even if it includes much more than us and exceeds us completely; what interests us is He, the Heavenly Man or the Great Man of the Heavens.

The will is an energy coming from the cosmic mind; it pulsates, before any external assertion or forward push; it palpitates within being, palpitation sign of the monad. Willing with Him, in Him, for His Work.

"Any being is the focusing of space into a point of electricity"; if this electric point is a natural fact, it is also the effect of a will – impersonal.

It may be timely to remind the following lines of the axiom 4.

"In Be-ness, un-manifested Root, stands the plane of Being which is Light, Life, electricity.

According to the law of periodicity, this point is in pulsation, from space to point, to space.

Reciprocally any space has a focal point.

Participating in this pulsation is called identification.

The lesser relation emanating from it is conscious sensitivity."

To help Him, how? By a united breath between Him and His manifestation (Rule 8), Him and His awareness; and we are only a tiny replica of His pulsation.

Imaginary path

In silence, let bind to a star of the great Bear. Take part in the Assembly and to the sound O that resounds there. With the 3 Buddhas of activity, inscribe yourself in the 3 aspects of the Heavenly Man: Transcending (1, crown), Penetrating (2, Heart), Expressing (3, Throat, human archetype).

He unites with the solar Logos, with the 4 stars of the great Bear, stimulating the 4 divine attributes: substance, pure sensitivity, with the Buddha.

With the 3 stars of the handle of the Cart, tune into the echo of the 3 emitting aspects: Will, Wisdom, Intelligence.

The 7 stars point out the way toward the solar monad, centre of the galaxy. Under this impact, is sensed the intensity of the dwarf galaxy GN-z11, emanation of the 1st order of the Unfathomable. It exerts a threefold tension: to arise, to open, to move.

This tension underlies the Cosmos, hence the galaxy, the 7 stars of the Great Bear, the 3 aspects of the Heavenly Man.

Take part in the attractor; add one's life to the power of the Heart, work in the selected field and manner; vitalize the human centre, archetype expression of the Heavenly Man, and microcosm tiny replica of the Macrocosm.

Inscribe the human (humus-manas) in these correspondences.

All this path is based on the evolution of a solar Logos [diagram CF:344].

In all, It arouses

The impression is to light up the sparks as if the electric plasma, Adi, was activating the monads. Far away echo.

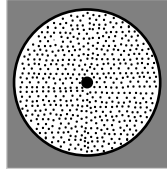

With all, with Us, thanks to It arouse.

Will SPIRIT

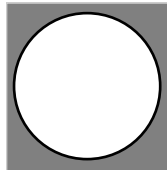

MEDITATION OUTLINE¹

It is, It springs, It wills.

'It is' gives the note: Peace. *To be* means to springs in ancient Greek; this connects us to the Source: It retransmits the background of the Cosmos. After I am that I am – atman – or I am That is – Brahman – atman eva Brahman is translated in the rule 13 by God is all.

To be in ancient Greek means to spring. *It springs* makes an echo to the will-to-be and to the uprising of the galaxy, for we think that, from its hyper massive black hole, springs forth the scale Spirit – Matter or the Real on dark background.

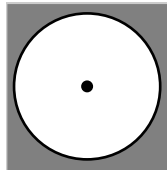

I wills, it forts of all Its intent or purpose; This willing evokes the subjective, and comes form its will-to-be, which makes It arise on the galactic background – Being of energy says Martin Muller. 1st cosmic Logos, 1st aspect of the solar Logos, hence point of tension in the centre.

An outline for meditating? The same of simpler. To participate in the impact of Shamballa in link with the solar Logos, for the monads are part of the planetary Logoï, though they are rent to the scheme of the Earth; they are the egos who incarnate [IHS]. Hence the link with Vulcan, Pluto or other planets. The human is a microcosm, the planetary, solar, galactic Logoï are replica of the Author of the Cosmos.

Remarks

1/ Universe –point of tension reminds the black dot in the centre of the white disk on dark background, first symbol of the Secret Doctrine. The universe is much vaster than 'my world' that refers to consciousness; There exists many more potentialities sensed or not. But in, fact, the universe, is all that we perceive in the planetary sphere, that which reverberates in it, hence in the perception of the Heavenly Man.

2/ The fractal U sound and the A sound can be inserted at any time.

3/ The triangle of constellations is assumed to be integrated after 3 years of practice; it is always possible to pass through it; it will be reminded at the end of the meditation with the 3 letters A, U, M.

4/ The zodiacal wheel can be distinguished as such: 1) the cardinal cross that concerns the future, 2) the fixed cross that concerns the subjective in a broad sense, 3) the mutable cross that concerns the change, more superficial, behaviour and attitude.

5/ Gn-z11 has the aim of making closer the Transcendent who, otherwise, could stay abstract, far away, inaccessible. Its intensity initiates the threefold tension of the Unfathomable.

¹ Begun ion September 3rd 2025

6/ The electric fire is pouring out until the 5th initiation. It spreads out in solar fire in the levels denser than the monadic level.

7/ AUM, Atman, to assist (to help), to assert the absolute thanks to 'I am that I am', participating in the Cosmos. U, to unite, spark of the galaxy. M, modesty, Multiplicity, to iMplement in a little sphere.

8/ A symbol is merely a form of expression; it is the limit of the visualization, the act does matter.

9/ The pure consciousness is expressed in the human archetype: **assertion – abstraction – direction – initiative**, **world – self – opening -gift**, **observation – mind – knowledge – creativeness**. Then appears the whole: **radiant intelligence**, hence detached. But this archetype requires for discerning it a great sharpness. These factors play in the mental unit (5.4), pulling then the action. The threefold pulsation of the Human Expressing is detailed in Vitalizing the human centre, a page shown in on the website.

The whole of Transcending, Penetrating, Expressing is externalized in life, consciousness, action - a full human archetype, replica of the Heavenly Man.

10/ The will-to-be (monadic will) sends back to It is; it is Its will to found existence, that makes it arise through all the sparks, the realized beings.

11/ The rule 10 talks about the O, full and rounded emitted by Sanat Kumara. The first books (Human and solar initiations) distinguished the liberating A, blast of the Breath, and the U resonance of the Sound shaping the One. A letter on the occult meditation evokes the seen great Breaths; for sure, a breath produces a sound in a certain tonality. The O, on the Adi plane, is rather a A slightly coloured by U; the U resounds fully on the 2nc plane, monadic, coloured by this planetary Logos and it gathers by the O the sparks of this Ray. The M implements the evolution at the following plane, atmic. The red OM, Aries, would rather be an A, the first breath, whereas the indigo OM, Capricorn, is more infused with the U, sensitivity, the M being very weak, a murmur.
